

NAME

repeat – loop audio data

SYNOPSIS

repeat [*count* [*infile* [*outfile*]]]

DESCRIPTION

Repeat the audio data in *infile* *count* times and store the result in *outfile*. Fractional *counts* like **0.5**, **1/3**, or **1:4** are permitted. Negative fractional *counts* put the incomplete part in the beginning. All files must be in the WAVE format. *count* defaults to **2**. *infile* and *outfile* default to **/dev/stdin** and **/dev/stdout**, respectively. The dash (-) is a shorthand for the default value.
