NAME
> stack – superimpose audio data

SYNOPSIS
> **stack** [[*infile* ...] *outfile*[**/**]]

DESCRIPTION
> Superimpose the audio data from the given *infile*s and store the result in *outfile*. Shorter data
> (with respect to both the number of channels and sample points) is periodically repeated. All files
> must be in the WAVE format. Filenames default to **/dev/stdin** or **/dev/stdout**. The dash (**-**) is a
> shorthand for the default value. If *outfile* is followed by a slash (**/**), application-specific metadata is
> omitted.
