NAME

stretch – rescale audio data

SYNOPSIS

stretch [*factor* [*infile* [*outfile*[**/**]]]]

DESCRIPTION

Speed up the audio data in *infile* by the given *factor* and store the result in *outfile*. Fractional *factor*s like **0.5**, **1/3**, or **1:4** are permitted. For negative *factor*s, the audio data is reversed. All files must be in the WAVE format. *factor* defaults to **-1**. Filenames default to **/dev/stdin** or **/dev/stdout**. The dash (**-**) is a shorthand for the default value. If *outfile* is followed by a slash (**/**)**,** application-specific metadata is omitted.
